Installation

Flood can be installed by following the Portainer guide for creating a new stack. Learn about configuring a Docker stacks and then use the following Docker Compose code to run this app:

```
---
services:
  flood:
    container_name: flood
    image: jesec/flood:latest
    user: 1000:1000
    restart: unless-stopped
    command: --port 3000 --allowedpath /downloads --allowedpath /config
    environment:
      - HOME=/config
      - TZ=America/Vancouver
    volumes:
      # Persistent Data
      - /srv/flood:/config

      # Download Folders
      - /mnt/downloads/:/downloads
    ports:
      - 3000:3000
```
