

Quick-Start Bundles

These pre-bundled templates can help you quickly get up and running with commonly-used combinations. Host a private office suite, manage your multimedia, build a professional website and more.

Office Suite

Docs

Includes: [OwnCloud](#) and [Collabora](#)

The screenshot displays the OwnCloud web interface. The top navigation bar includes the 'Files' menu, the OwnCloud logo, and search and user icons. The left sidebar contains navigation options: 'All files', 'Favorites', 'Shared with you', 'Shared with others', 'Shared by link', 'External storage', 'Deleted files', and 'Settings'. The main content area shows a file manager view for the 'Documents' folder, listing folders: 'Projects' (110.3 GB, 4 days ago), 'Research' (1.4 GB, 2 months ago), and 'Unsorted' (0 KB, 6 months ago). Below these is a summary for '3 folders' totaling '111.8 GB'. On the right, a 'Projects' folder is selected, showing a comment section with a user profile for 'Josh' and a text input field for a new comment. The comment section also includes 'Activities', 'Comments', and 'Sharing' tabs, and a 'Post' button.

Host your own private cloud solution with [OwnCloud](#) to remotely access your files or securely share them with friends. Integrate [Collabora](#) to edit your documents right in your web browser.

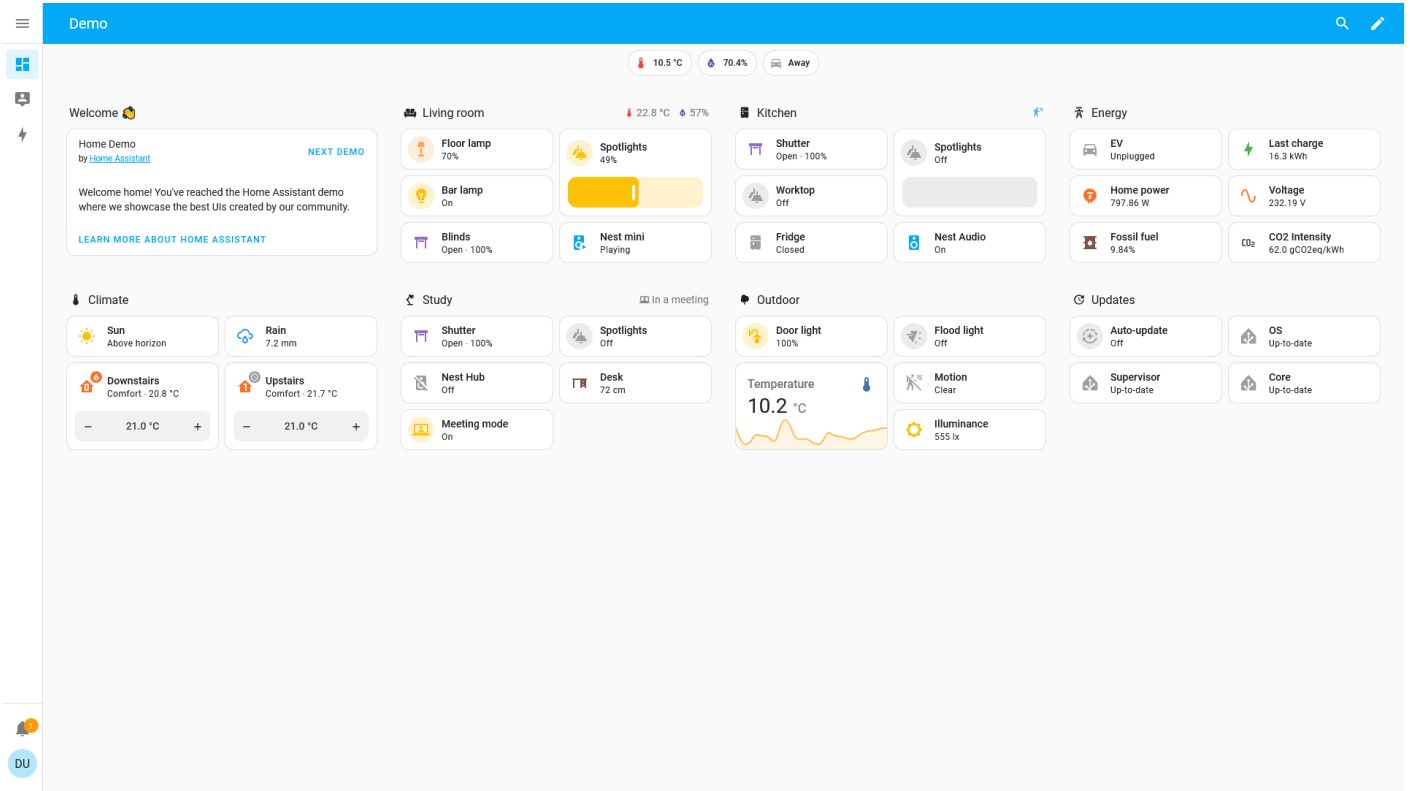

Leverage OwnCloud apps to manage your own calendar, contacts, notes and even your music collection.

Smart Family

House

Includes: [Grocy](#), [Actual Budget](#), and [Home Assistant](#)

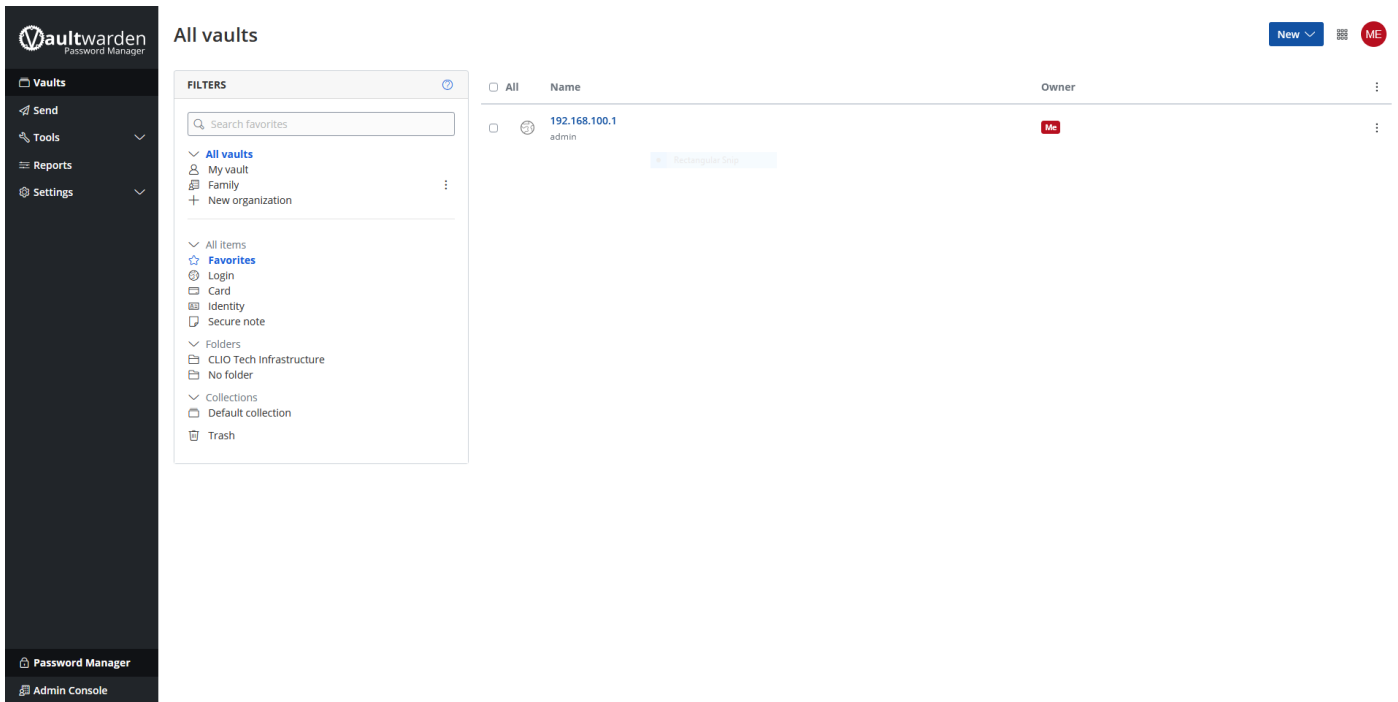

With [Grocy](#) you can manage your kitchen's inventory, build a recipe book, organize weekly chores, and assign one-time tasks. Take control of your finances with [Actual Budget](#) and sync directly with your bank. Finally, add [Home Assistant](#) to control smart devices and design a family dashboard.

Security & Privacy

Encrypted

Includes: [VaultWarden](#), [Duplicati](#), and [AdGuard Home](#)

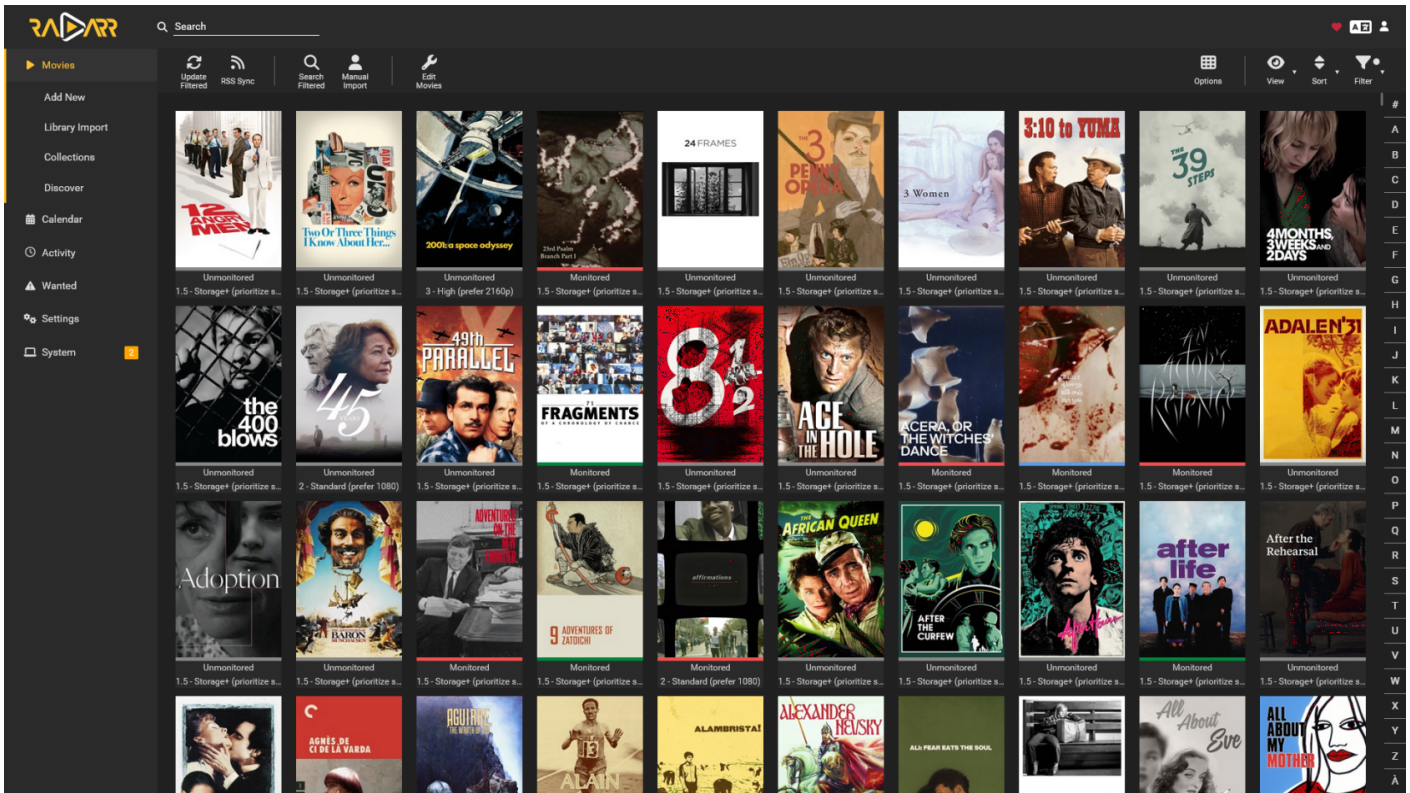

Take control of your family's password manager using [BitWarden](#) and keep your private data secure. Handle your own multifactor authentication and audit your passwords for security breaches. Bolster your internet privacy by using [AdGuard Home](#) to perform your own web lookups and stop snooping. Create a secure off-site backup solution using [Duplicati](#) and make sure you never risk losing important data.

Media Managers

Media_link

Includes: [Radarr](#), [Sonarr](#), [Lidarr](#), [Readarr](#) and [Bazarr](#)

Curate your movie, television, music and book collections and make sure they have up-to-date metadata for your media servers.

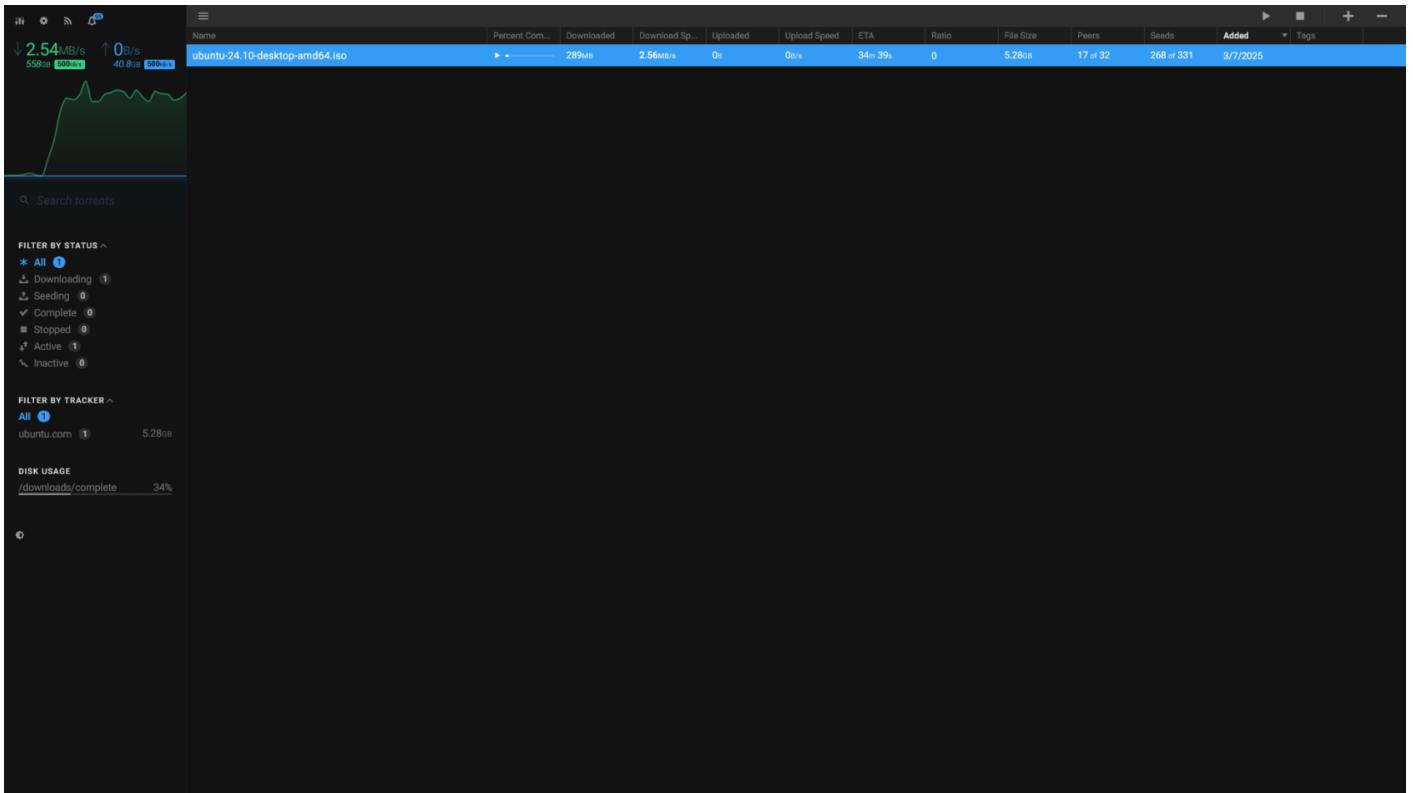

Integrate [Radarr](#), [Sonarr](#), [Lidarr](#) and [Readarr](#) with a [torrent download server](#) to search for media automatically. Using [Bazarr](#), find subtitles for your movie and television collection.

Torrent Server

Cloud_download

Includes: [qBittorrent](#), [Gluetun](#), [Flood](#), and [Prowlarr](#)

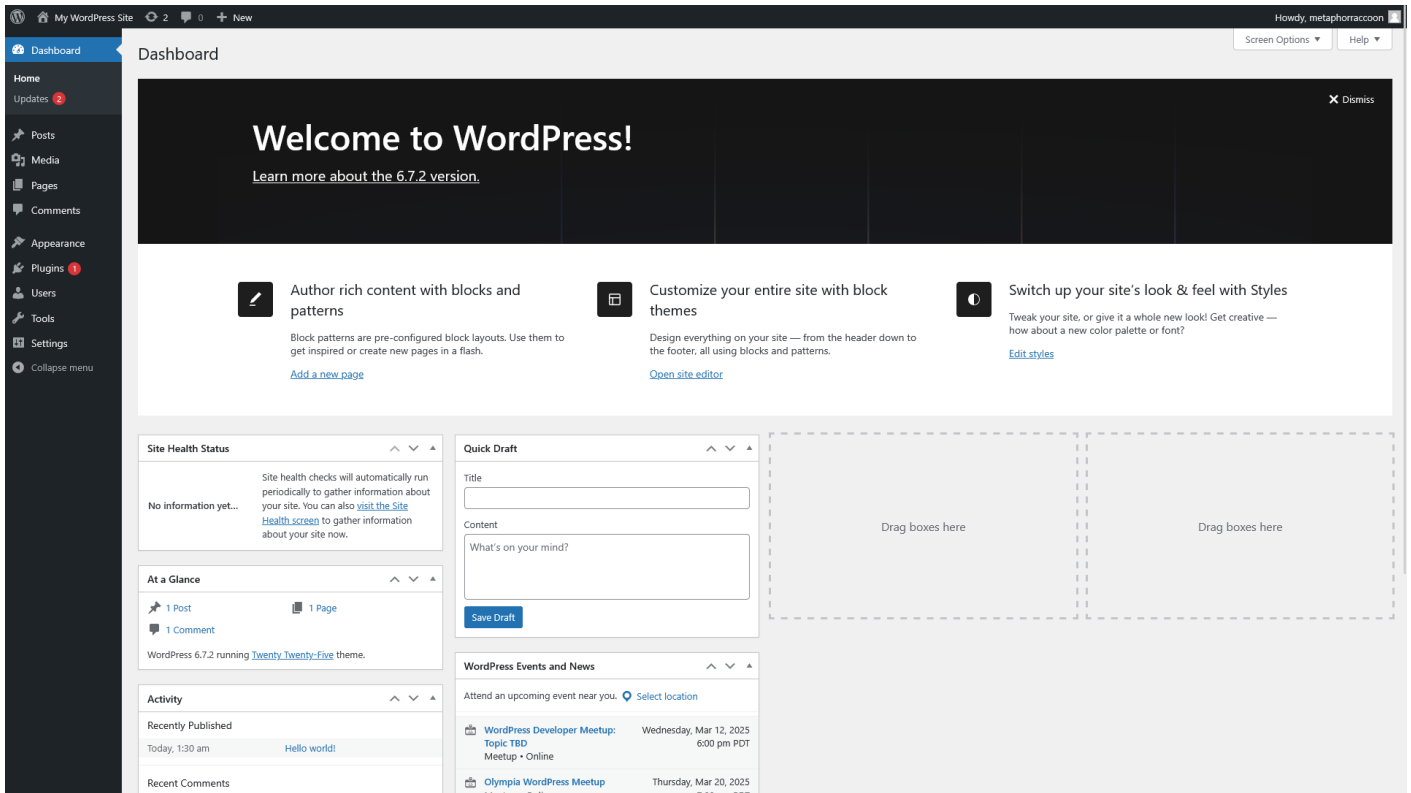

Securely access the popular peer-to-peer torrent network through a virtual private network. [Prowlarr](#) can search across multiple indexers at once and find the perfect torrent. Download it with a [qBittorrent](#) server, keep it private using [Gluetun](#) and manage your seeds with the modern [Flood](#) interface.

Professional

Work

Includes: [WordPress](#) and [Reactive Resume](#)

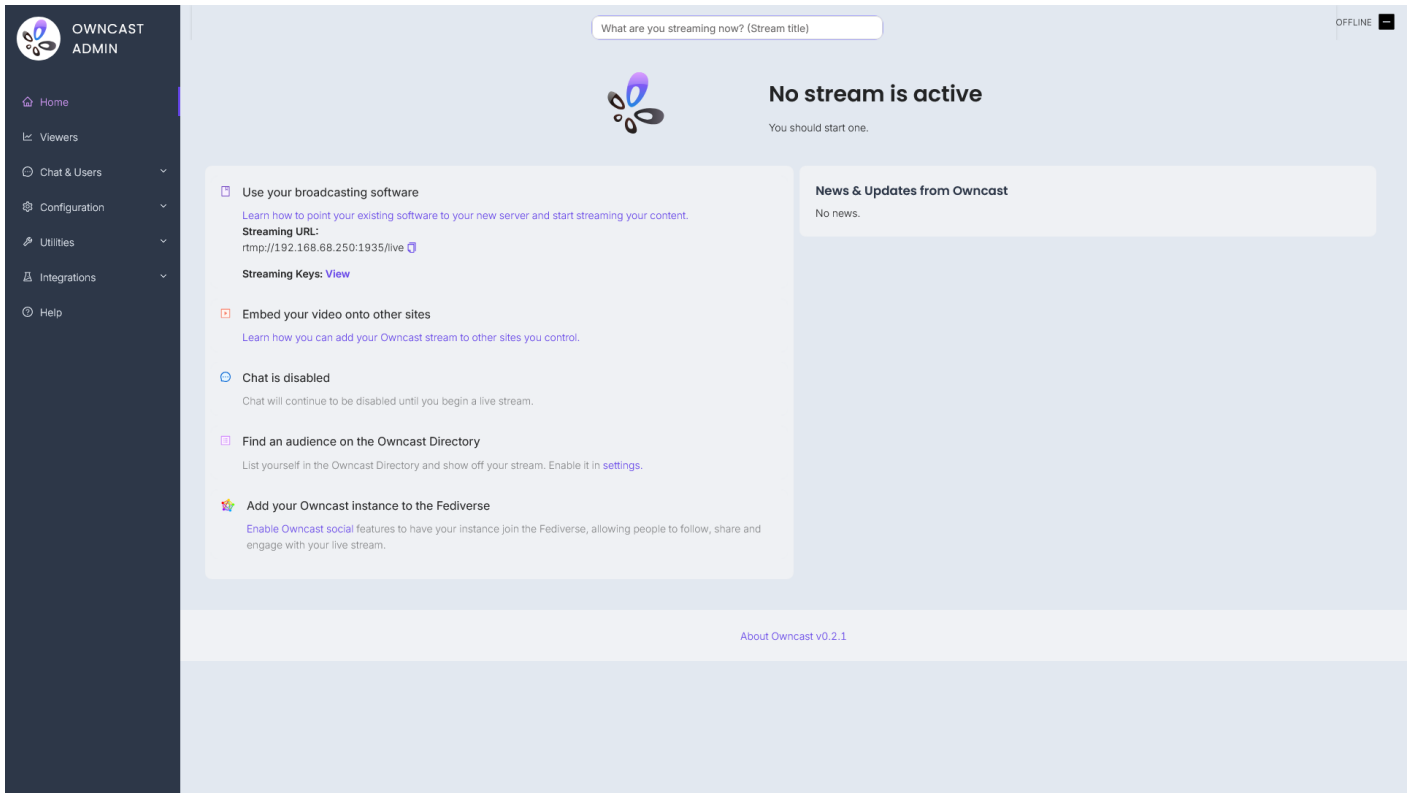

Create a professional website using [WordPress](#) and build yourself a [Reactive Resume](#).

[Learn More](#) `keyboard_arrow_right`

Streamer

Includes: [OwnCast](#), [WordPress](#), and [Kill Bill](#)

Create a blog for yourself using [WordPress](#) and host your own stream with [OwnCast](#). Take control of your own subscription service using [Kill Bill](#).

[Learn More keyboard_arrow_right](#)

Online Community

Diversity_2

Includes: [WordPress](#), [Flarum](#), [Fider](#), and [Umami](#)
